⁽¹⁾ The non-cash goodwill impairment charge is not allocated at the segment level because the underlying goodwill asset is reflective of our corporate investment in the segments. We do not include the impact of goodwill impairment charges in our evaluation of segment performance.

Computational Note: In some instances, individual quarters may not sum or average, as appropriate, to the respective full year amount due to rounding.

⁽²⁾ Consists of our full-time professionals who provide consulting services and generate revenues based on the number of hours worked.

⁽³⁾ Utilization rate for our full-time billable consultants is calculated by dividing the number of hours all of our full-time billable consultants worked on client assignments during a period by the total available working hours for all of these consultants during the same period, assuming a forty-hour work week, less paid holidays and vacation days.

⁽⁴⁾ Average billing rate per hour for our full-time billable consultants is calculated by dividing revenues for a period by the number of hours worked on client assignments during the same period.

⁽⁵⁾ Consists of cultural transformation consultants within our Studer Group solution, which include coaches and their support staff, consultants who work variable schedules as needed by our clients, and full-time employees who provide software support and maintenance services to our clients.

⁽⁶⁾ Full year operating metrics are calculated using the appropriate full year data. As the results of operations of our acquisitions are only included in our consolidated results of operations from the date of acquisition, certain full year operating metrics cannot be calculated using a simple summation of the four individual quarters presented.
