- (1) Consists of our full-time professionals who provide consulting services and generate revenues based on the number of hours worked.
- (2) Utilization rate for our full-time billable consultants is calculated by dividing the number of hours all our full-time billable consultants worked on client assignments during a period by the total available working hours for all of these consultants during the same period, assuming a forty-hour work week, less paid holidays and vacation days.
- (3) Average billing rate per hour for our full-time billable consultants is calculated by dividing revenues for a period by the number of hours worked on client assignments during the same period.
- (4) Consists of consultants who work variable schedules as needed by our clients, as well as contract reviewers and other professionals who generate revenues primarily based on number of hours worked and units produced, such as pages reviewed and data processed. Also includes full-time employees who provide software support and maintenance services to our clients.
- (5) Individual quarters do not sum or average, as appropriate, to the respective full year amount due to rounding.
- (6) Full year operating metrics are calculated using the appropriate full year data. As the results of the EPM practice, which we acquired on October 1, 2013, are only included in our fourth quarter results, full year operating metrics cannot be calculated using a simple average or summation of the four individual quarters presented.
